

NUPLA

CERTIFIED INSULATED NON-CONDUCTIVE TOOLS

PROTECTION FROM ACCIDENTAL
HIGH VOLTAGE CONTACT

- Insulated Non-Conductive tools undergo 100% testing to meet or exceed IEC 60900 and ASTM F1505 standards for 1000V. Each tool carries its own unique serial number registered at Nupla Corporation.

- Solid Nuplaglas® handles are manufactured in Safety Orange for easy identification. Laser marked 1000V with high voltage double diamond.

- Shovels are manufactured with Nupla's patented Power Pylon® blades. No shank means less breakage in the severest of conditions. Outperform other closed back, solid shank blades and carry 17% more payload.

- Digging Bars, Post Hole Diggers and Picks are all produced to the same electrical standards with Nuplaglas® handles and high grade, heavy duty steel.

- Used by utilities, railroads, highway departments and electrical contractors.
